

## Accommodation management

The shared accommodation is managed and supervised by specialist staff of the Administrative District Office (Accommodation Management, Social Care). The tasks of the accommodation management team are diverse. They include managing and organising the shared accommodation and ensuring general operation, as well as the reception, distribution and accommodation of refugees allocated by the Regional Council in accordance with reception quotas. Furthermore, the accommodation management team supports the Department for Social Care in general issues relating to refugees and provides the necessary assistance on a day-to-day basis. The accommodation management team are also the point of contact for involved authorities. As the main persons responsible for safety in the accommodation, the accommodation management team regularly carry out patrols and thus ensure compliance with the house rules and the fire safety regulations. The day's schedule however also includes administrative tasks, such as for example the registration of new arrivals at the registration office, the opening of bank accounts or the distribution of initial supplies. The refugees are actively involved in house management as a part of charitable work. After the conclusion of the residence period in the accommodation, the accommodation management team organises for the refugees to be relocated to subsequent accommodation in the cities and municipalities or to private housing.
